Access All Your Solutions From One App
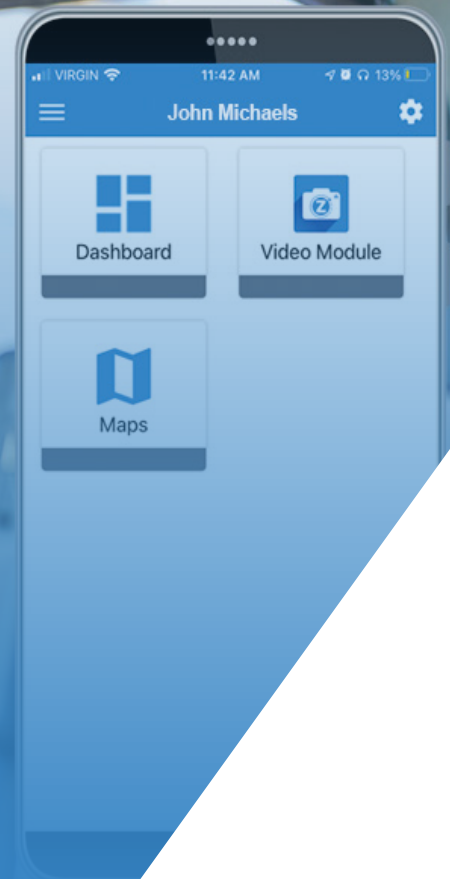

ZenduOne App

A comprehensive dispatch, operations and accounting system

Introducing ZenduONE app, a one stop shop for all your solution needs. Now with a few clicks, users who download the mobile app from the IOS or PlayStore will be able to access all of their solutions while on the move.

What does this mean? When leveraging ZenduCAM dash cameras, fleet managers and even drivers can review videos on the go. Meaning management can coach drivers from anywhere and drivers can coach themselves on the go.

- ⊘ Mobile access to all of ZenduIT's leading fleet management solutions

- ⊘ Available now on IOS & PlayStore

- ⊘ Easily manage drivers hours-of-service and driving logs

- ⊘ Receive updates and alerts of driver's activity and status in real-time

Mobile Coaching
Review dash camera videos to offer corrective training

Real-Time Updates
See live driver activity and status notifications on your mobile device

Increase Safety
Monitor drivers hours and behaviour to keep safety top of mind

A One Stop Mobile Shop For All Of Your Solution Needs.

Step 1: Rule Triggered
Alerts and notifications are set up if a driving incident or driving rule is triggered by a driver.

Step 2: Video Transmitted & Reviewed
Once an event is triggered, the video will be sent to managers to review and either dismiss or escalate the event. If the event is escalated, the user will be able to conduct training to coach the driver in what was incorrectly done during the event.

Step 3: Driver Self-Coaches
If escalated, the driver will be prompted to review and acknowledge the event. Allowing for the driver to self-train themselves of what behaviours they will need to change.
