- Ultrasonic Sensor
- 1080p Rear Camera
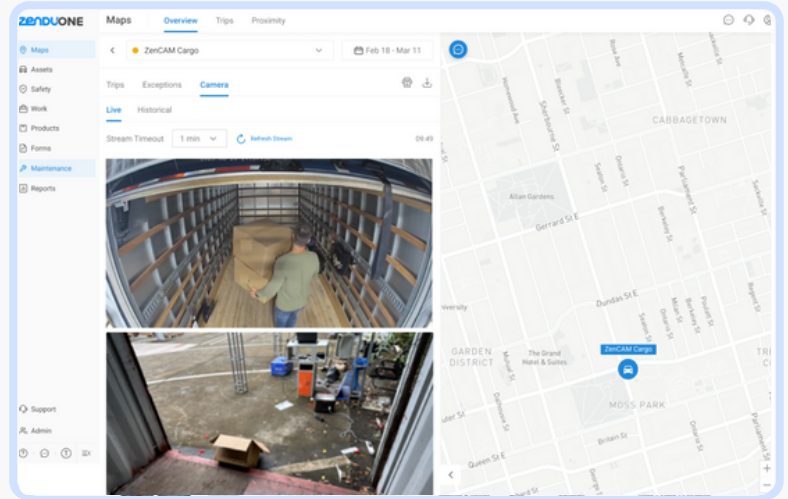

* Coming Soon

Tailor-Made Features

- **Real-Time Cargo Monitoring** – Gain full visibility with AI-powered tracking and alerts.

- **Enhanced Security & Theft Prevention** – Protect high-value assets with automated alerts and remote monitoring.

- **Optimized Fleet Efficiency** – Reduce empty miles, lower costs, and improve cargo utilization.

BENEFITS

Smart Cargo Monitoring

Achieve continuous visibility into your cargo's status and location with AI-driven systems. This capability enables prompt issue detection and resolution, minimizing delays and enhancing customer satisfaction

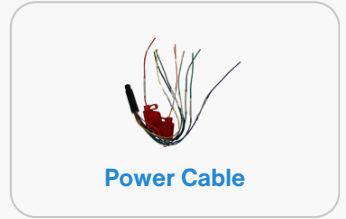

Enhanced Cargo Security

Prevent theft by utilizing advanced AI-based surveillance systems that detect unauthorized access and anomalies, providing instant alerts for swift intervention. This proactive approach deters theft, safeguards valuable assets, and maintains your company's reputation for reliability.

Optimized Load Management

Maximize trailer capacity and reduce operational costs by assessing cargo volumes and optimizing load matching. This approach ensures efficient use of available space, minimizes empty miles, and enhances overall fleet efficiency.

HOW TO INSTALL

01

Hardwire Installation

The ZenCAM Cargo is designed for easy installation by mounting the host unit inside the cargo box, securing the battery box externally, and connecting to vehicle power via ACC or width indicator lights.

02

Quick Setup via MyInstallHub App

The MyInstallHub app streamlines installation, enabling users to quickly install and configure the cargo camera system. With step-by-step guidance and automatic database synchronization, users can effortlessly complete the setup process.

03

Automated Device Addition & Notifications

Once installed via the app, the cargo camera device is automatically added to the database, ensuring seamless data integration. Customers receive automated notifications after each installation to verify successful setup.

PRODUCT SPECIFICATION

Audio	No Audio
Recording	Inside Cargo: Blacklight 4K Outside Cargo: 1080p
Network band	WIFI: 2.4 G 4G: Global coverage with multi-band support for North America, Europe, Asia, and Latin America
Power Supply	9-36 V
Power Consumption	≤ 9W
Solar Panel Power	3W
IP Rating	IP69K
